Notes:

1. Student and class level scores are updated throughout the day, school and district level scores are updated each night.
 2. The results for domains that are measured with fewer items are less reliable than for domains measured with more items. Thus, when few items are used to measure a domain, other measures (e.g., observations, homework, etc.) should be used to confirm the results reported here.
- ##This assessment contains several pilot items that may be used on future Readiness tests. Pilot items will not be included in the students raw score, scaled score, or on reports.
